

Innovate Value for Enterprise Messaging and Search

About Openfind

Established in January 1998, Openfind Information Technology, Inc. has continuously invested a great deal of effort in two main technologies, enterprise messaging management and search solutions, and has achieved exceptional reputation over the past ten years. Our products can simplify corporate governance, knowledge sharing & retrieval and personal information communication, and have been widely implemented to deliver large-scale search engines and carrier-grade messaging systems.

Starting in year 2008, the importance of messaging security has been broadly recognized all over the world. Enterprises begin bringing into line with E-mail Active Archiving Solution to carry out the e-mail management policies, including complete retention, real-time retrieval, instant recovery and mail auditing. By taking advantage of the two main technologies, Openfind is capable of providing the support needed to help companies implement the mail audit and archive management.

To accelerate the establishment of social networking, enhance knowledge management and improve communication efficiency, Openfind continues dedicating to developing and refining relevant Internet technologies to provide the best products and services to all of our customers and partners. On the trend towards Software as a Service (SaaS), Openfind will deliver open standards compliant software and hosting services to grow with customers and the market opportunities.

Our Advantages

Flexible, Scalable and Cost-effective

While e-mail has been the critical delivery application for today's business, the challenge is how to manage and fully utilize a large volume of information in time. To enable enterprises to manage data painlessly, Openfind helps customers to replace their existing systems with a low-cost and high-performance solution. With the outstanding and extraordinary software performance and technology assets, Openfind definitely can be the best facilitator towards the way of effective and reliable communication.

Speed Time to Market with Comprehensive Solutions

Through well-designed technology, Openfind offers the complete solution as a stand-alone product, an appliance or as the managed service, which enables solution providers to accelerate time to market with easy integration to deliver complete messaging and search solutions based upon Openfind platforms.

Validated Search Capability by Renowned Customers

Openfind's superior large-scale search and messaging capability enables enterprise-wise solutions dealing with growing volumes of data, including support for real-time indexing and multi-lingual approximate matching. With the world-class technology, Openfind is trusted by over thousands of enterprises globally.
